

Dear Prof. Matters,

Please accept this letter as my response to ACER's OP Review.

It seems as though ACER is not considering external examinations, and may continue social moderation.

If this is so, than ACER's approach is contrary to the recommendations of Queensland's 2013 EIC Parliamentary inquiry, and also contrary to ministerial direction for maths and sciences.

I would urge you to :-

1. Abolish the current unproven assessment and tertiary entrance methods
2. Introduce standard, senior exit examinations

This submission, including my name may be published, but not my address or contact details

Yours sincerely,

Daniel Hart.
